Strategic Growth Recommendations

A Data-Driven Analysis of 2014-2017 Performance Metrics

Prepared for Executive Leadership

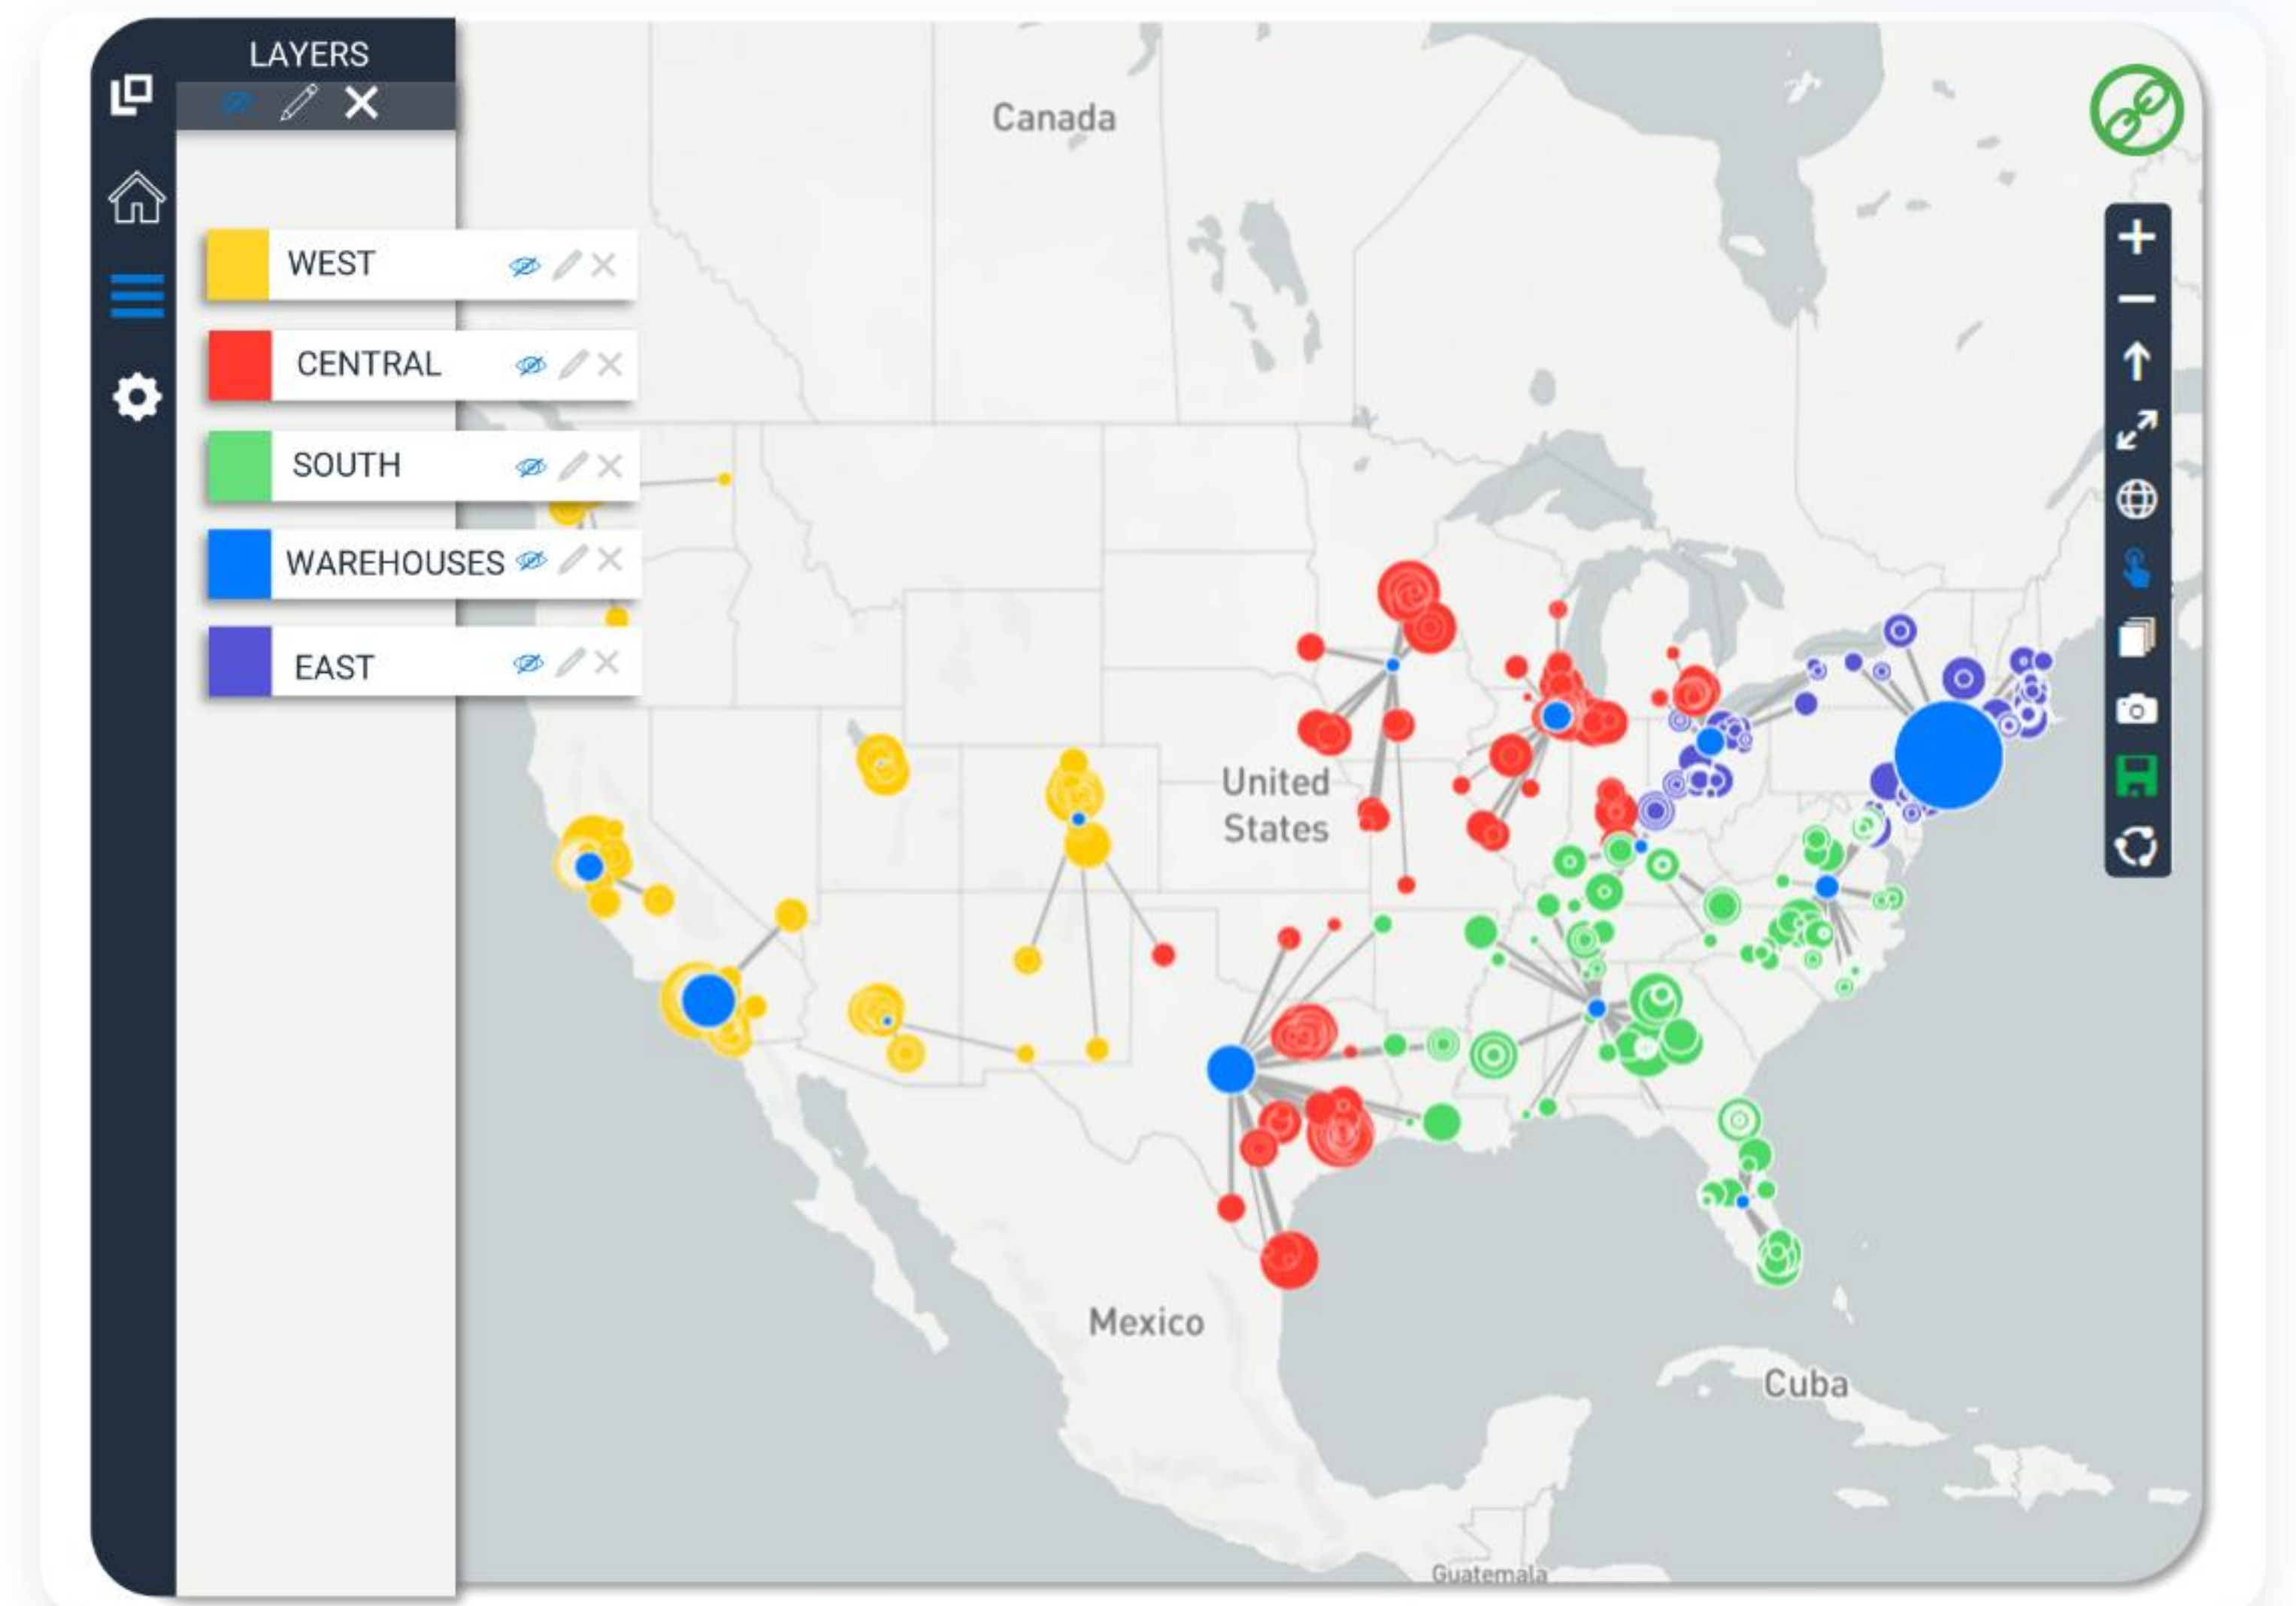

Regional Profitability Optimization

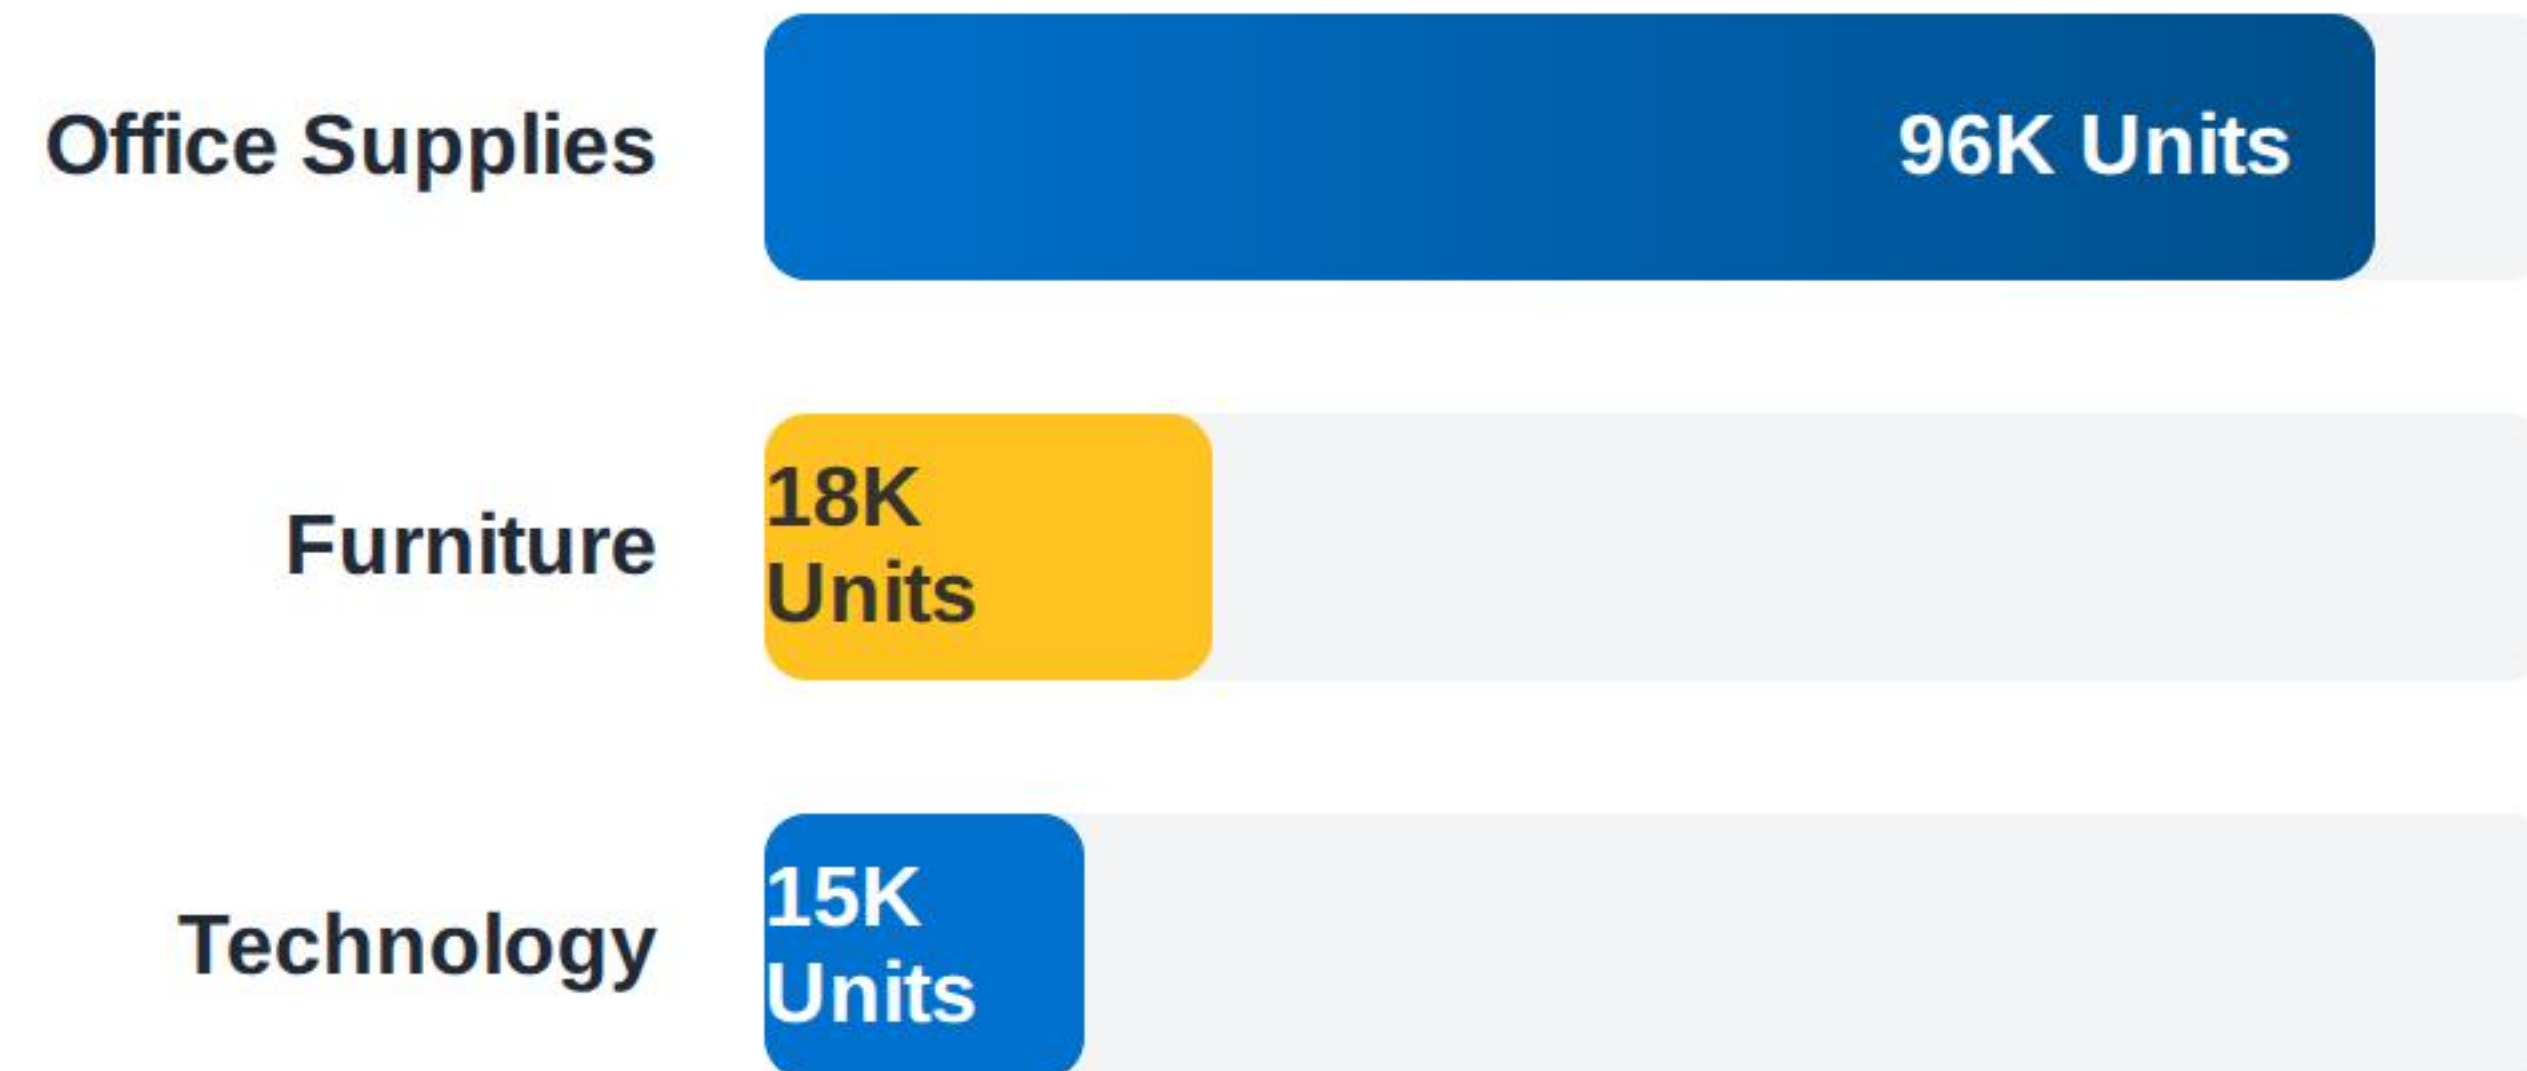

Performance Insight: The West (41.1%) and East (32.4%) regions generate over 73% of total profit, indicating mature market dominance but plateauing growth potential.

Strategic Action

Aggressively invest in supply chain automation within the **Central (13.6%)** and **South (12.9%)** regions to mirror the operational efficiencies seen in the West. Targeting a 5% margin increase here could yield an additional \$15M in annual profit.

High-Margin Product Mix Evolution

*Quantity by category as observed in historical dashboard data.

Inventory Recommendation

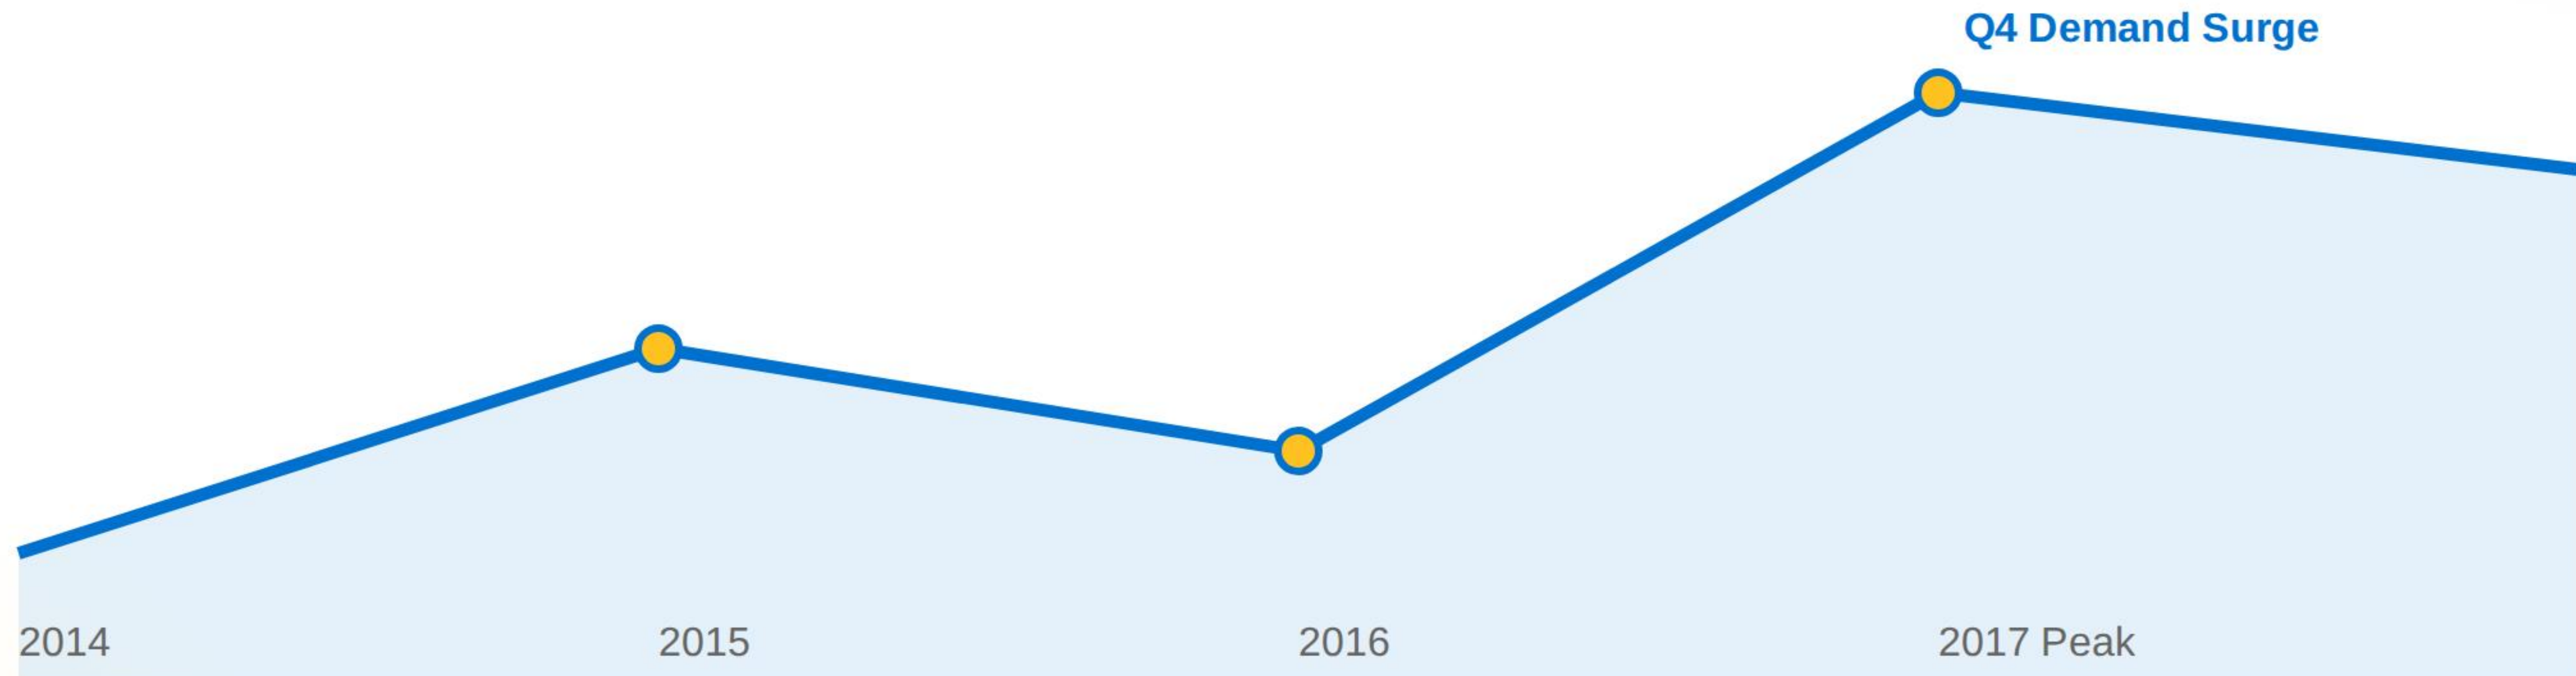

While Office Supplies drive high-frequency foot traffic, they represent lower individual margins. Walmart should implement "**Tech-Bundling**" at point-of-sale.

- Convert office supply volume into Tech upsells.
- Optimize Furniture logistics to reduce high storage overhead.

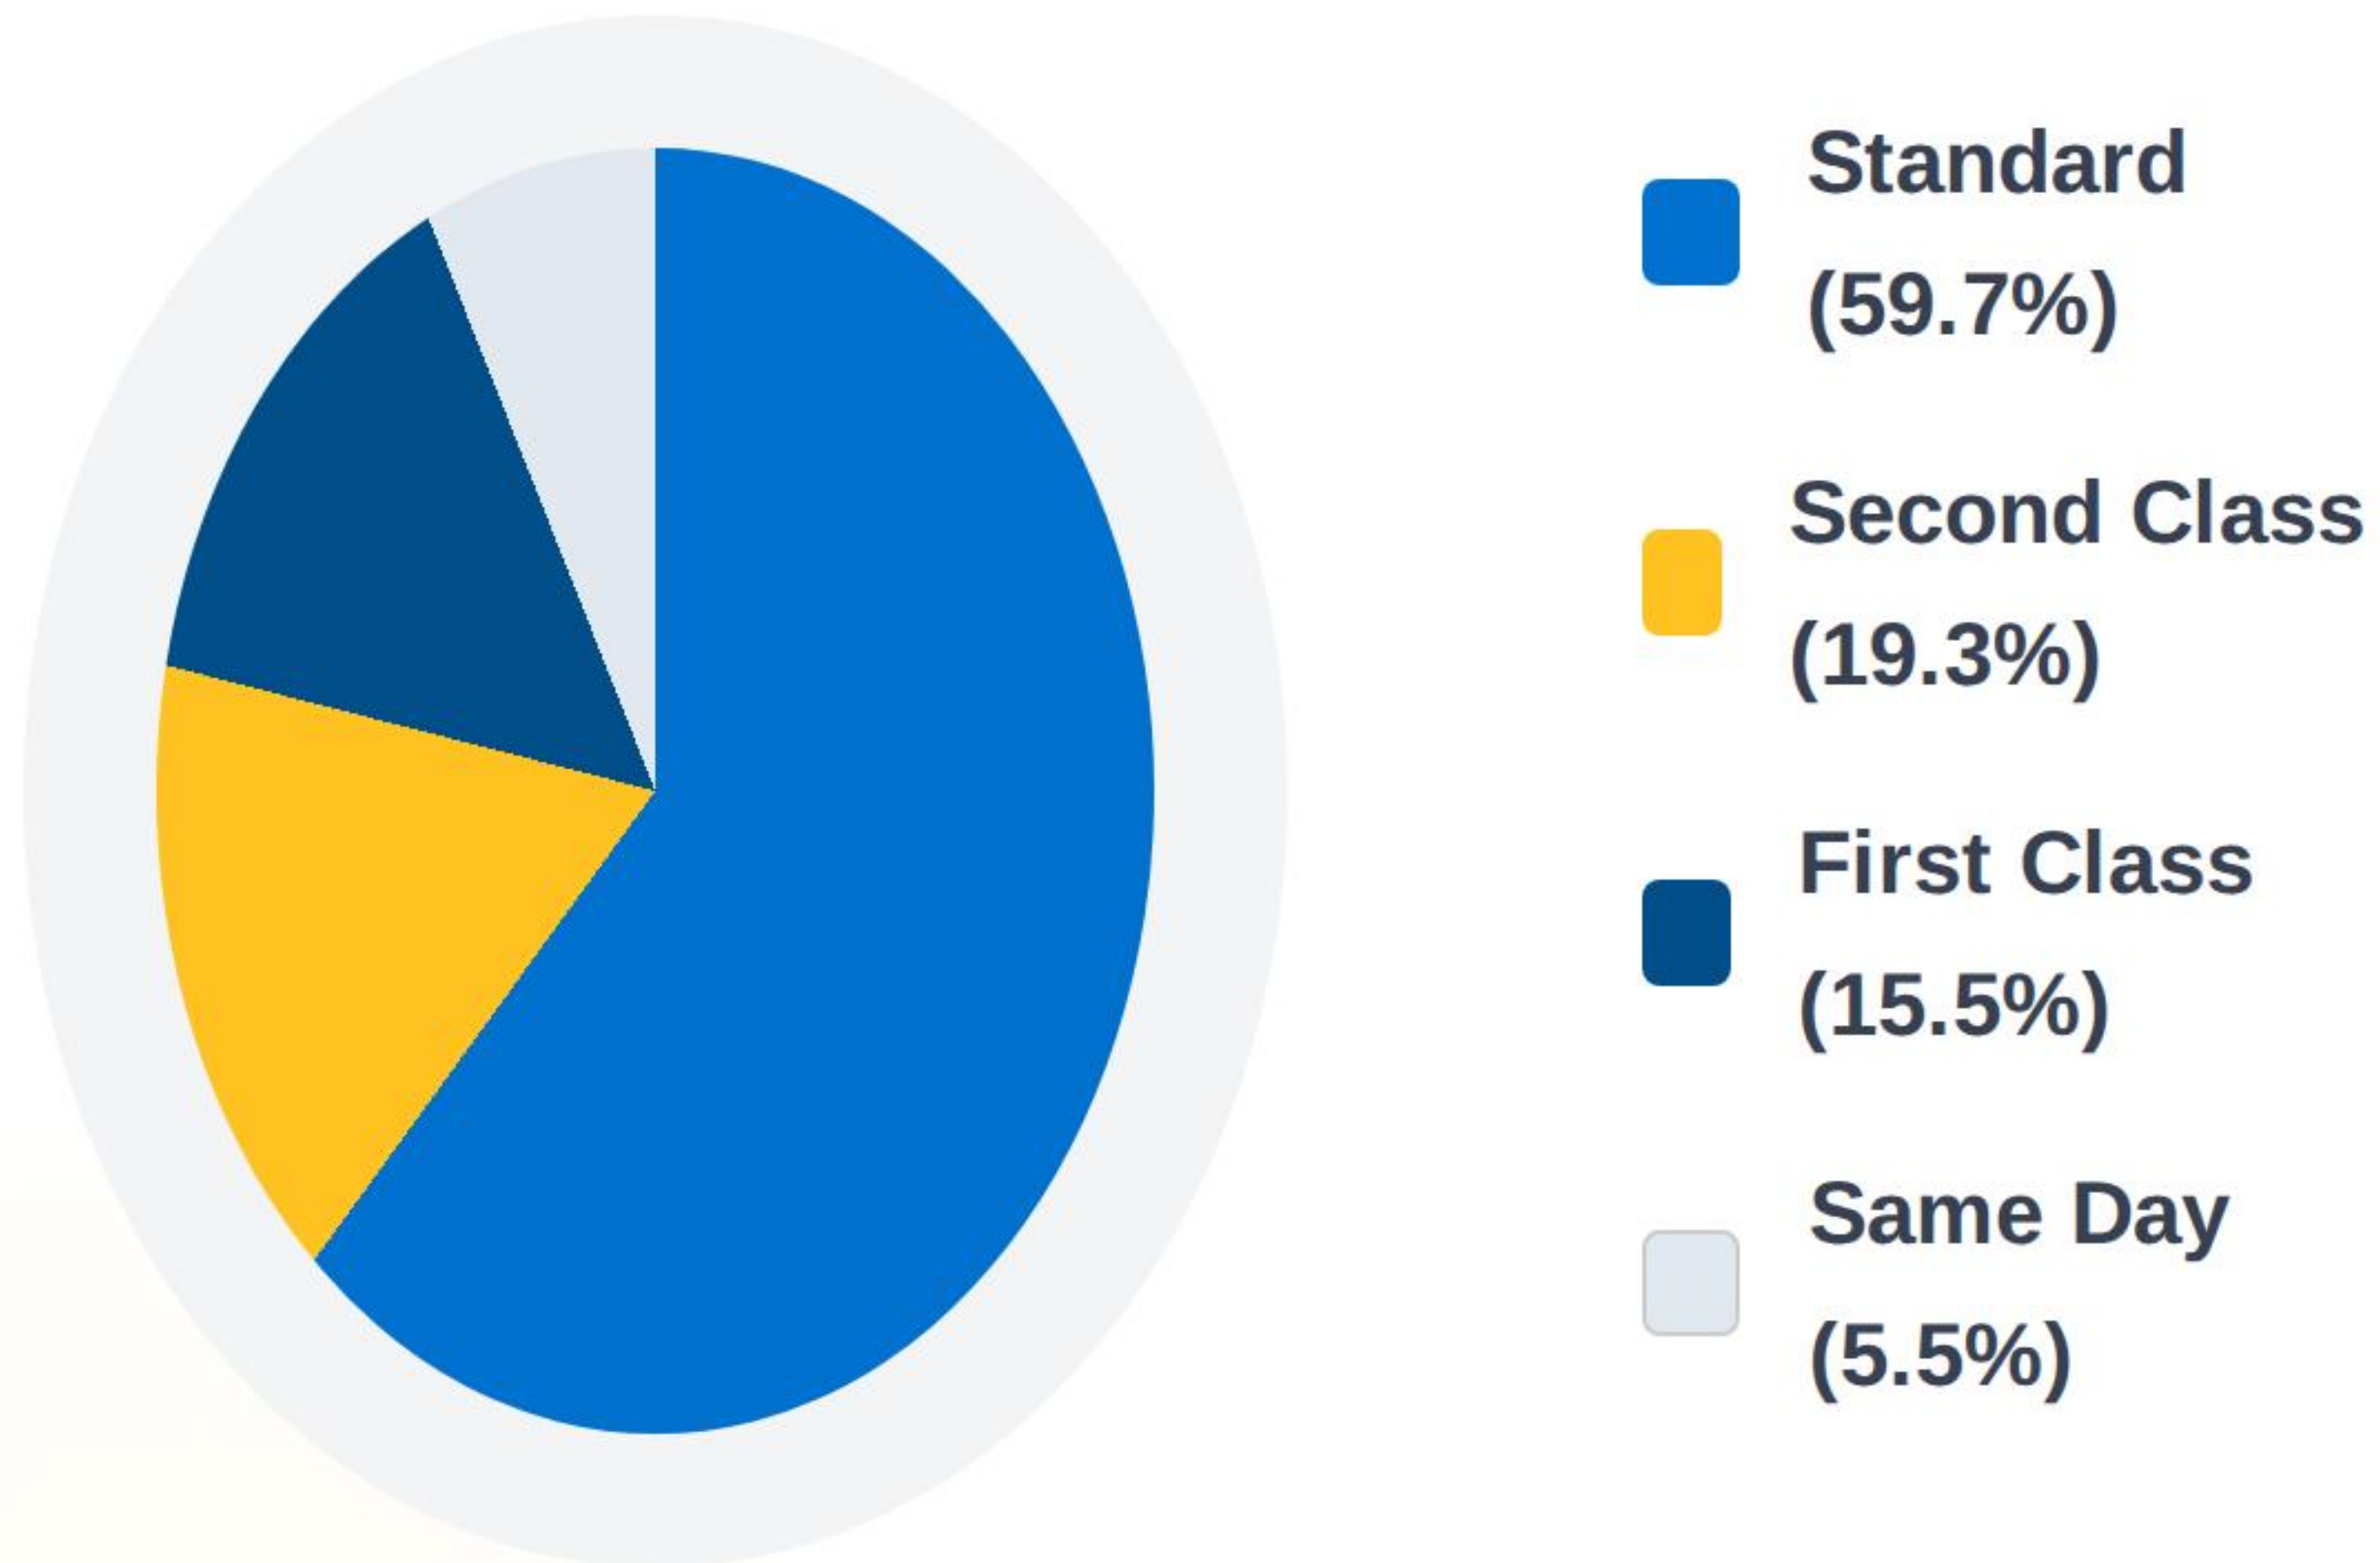

Seasonal Surge Management

Historical Trend Analysis: 2014-2017 data reveals consistent volatility with extreme spikes occurring late in the fiscal year (Q4).

Action: Shift from reactive restocking to **Predictive Inventory Staging**. Pre-allocate inventory to regional hubs in Q3 to mitigate stockouts during the verified late-year surges, reducing "out-of-stock" instances by an estimated 12%.

Modernizing Delivery & Fulfillment

Fulfillment Transformation

The **5.5% Same Day delivery** rate is a critical vulnerability. To compete with dominant e-commerce players, Walmart must pivot:

Incentivize Walmart+ membership to shift the distribution from 'Standard' to 'Fast' fulfillment, increasing basket frequency.
